Richard S. Maddox

www.calstatela.edu

The Early Entrance Program (EEP) at Cal State LA - one of the few opportunities for accelerated education nationwide - is unique for several reasons.

The program accepts qualified students as young as 11 years of age and features a large population of other gifted students. "EEPsters," as they are known, attend regular college classes on campus, where an all-important support system is in place for them. EEPsters begin full-time study upon acceptance and earn their baccalaureate within four to five years.

A suite of rooms - including a kitchen, study room, computer room and social areas - are available for the students' exclusive use. Within this complex are the office of the

director, counselor, and staff, ever ready to lend a hand or ear.

Cal State LA provides many advantages as a site for an Early Entrance Program. Occupying a 175-acre hilltop facing the San Gabriel Mountains, it is only five miles from downtown Los Angeles with two major freeways allowing easy access to the campus. The University offers more than 80 major programs in 50 academic departments, enabling undergraduates to lay the groundwork for a variety of careers. Small classes and access to faculty members dedicated to teaching excellence make the education process personal and rewarding. Research opportunities abound, offering valuable experience and preparation for graduate work.

www.corebaby.org

Cleveland Humanities Magnet High School is a highly academically challenging and intensive college preparatory program. What were once considered conventional English and Social Studies courses are made truly interdisciplinary in the Magnet, with the addition of classes in philosophy and aesthetic history, all coordinated under thematic units. Cleveland's interdisciplinary classes, called CORE, blur the distinctions between disciplines so students experience continuity in their education. The four primary classes in the program are History, Philosophy, Art and Literature with an integrated Science component in the 9th grade. Heavily writing-based, Cleveland Humanities Magnet's interdisciplinary nature breeds inquiry, sparks dialogue and debate and helps develop critical thinking skills. Students take additional courses (including math, science, and electives) to round out their schedules. For college-bound students, a Cleveland Humanities Magnet education is a major asset, with a depth and breadth of learning atypical in other high schools.

Our role is really quite straightforward: to inspire and to be inspired by the community of adults and students working toward high ideals.

Groton unlocks students' potential in many ways, not least of which is by teaching intriguing academic content, stressing the primacy of critical thinking and problem-solving, and enabling and enhancing communication skills in a world of rapidly changing media and technology. Ultimately these skills, and a well-honed work ethic, lead to good decision-making, mindfulness, and creative approaches—ingredients that produce leaders. But Groton is known not only for its 130-year legacy of enhancing leadership skills, but also for building character in those who aspire to lead.

The Zoo Magnet Center high school is a model small learning community located adjacent to the Los Angeles Zoo in Griffith Park. In partnership with North Hollywood High School and the Los Angeles Zoo, the Zoo Magnet offers 300 LAUSD students from across the city a challenging college preparatory curriculum focused on animal studies and biological sciences with a strong emphasis on student research and the development of analytical thought. The curriculum is rigorous and graduation requires mastery of

several academically challenging science courses not required of students in other California high schools. The singular campus setting provides a multitude of learning environments unique to any school in California, and perhaps the nation. Students can access the extensive academic, athletic, and cultural opportunities offered on their main campus.

Founded in 1951, Oakwood School is a coeducational, independent, non-sectarian, college preparatory school in North Hollywood. The secondary school includes approximately 480 students in grades 7 through 12. Oakwood draws its student body from the diverse communities of Los Angeles County. Young people prosper with small classes, rigorous academics, individualized programs, and rich communities in S.T.E.A.M., music, performing arts, visual arts, writing, debate, and competitive sports. While our program is college preparatory, we are equally concerned with the quality of childrens' experiences in the present. Oakwood believes that school must be rewarding in its own right, and not merely a step along a pathway to college. Oakwood recognizes that we can achieve these aims only when students' experiences are predominantly positive and joyful, and when their relationships with teachers are caring and trusting. We consider childhood precious, and we take young people seriously.

The mission of Polytechnic School is to develop the intellect, talents, and character of each student in a community of learning dedicated to principles of academic excellence that values the uniqueness and dignity of each member and fosters personal responsibility and service to others.

Polytechnic School, a college preparatory school established in 1907, is dedicated to the education of students from kindergarten through 12th grade. It is founded on the principles of academic excellence, personal and communal responsibility and service to others. Poly offers small classes and a strong and rigorous academic program that is responsive to the development and learning needs of our students. Integral to the education experience at Poly are activities beyond the classroom including athletics, outdoor education, community service, and the visual and performing arts. The foundation on which the educational mission of the school rests is the commitment to respect every member of the community. Poly values both the character of each individual and the larger sense of community in which the individual may grow and flourish. A Poly education encourages students to become intellectual leaders who are prepared to become contributing and responsible citizens in their communities. The school expects to develop in its students a joy for learning, an appreciation for the value of friendship, a life-long relationship with the school, and the commitment to be of service to others. The goal of Poly is to have graduates prepared to meet the complexities of a changing world with confidence and good character.

Sequoyah School is an independent school located in Pasadena, California. Sequoyah is now expanding its program to high school starting with enrollment of 9th and 10th grade in the fall of 2016. Founded in 1958, the school is committed to an education that "challenges the mind, nurtures the heart, and celebrates human dignity".

At Sequoyah's high school, teachers will be challenging students to use their knowledge and skills to solve essential questions at the heart of contemporary challenges. Students will develop initiative and self-direction, through advanced college preparatory coursework and field studies emphasizing global perspectives and cultural competency. Independent study and collaborative effort, will culminate in a senior-year social impact project. Faculty advisors will guide students over four years through strategies for social, emotional and academic learning. Freshmen and sophomore classes begin fall 2016. Founding students will participate in creating a high school community defined by Sequoyah's long-held values: active citizenship, advocacy for social justice, and environmental stewardship. The new high school campus will be situated at 301 N Orange Grove Blvd, Pasadena adjacent to the Gamble House and Arroyo Seco athletic facilities.

Sequoyah is accredited by the Western Association of Schools and Colleges and is a member of the National Association of Independent Schools.

Taft Charter High School, with its outstanding School for Advanced Studies (the Individualized Honors Program and Traditional Honors Program) and its new Gifted STEAM Magnet, prepares students at the highest level for their future post-secondary studies. Students, who have matriculated through the School for Advanced Studies, have attended the most prestigious public and private universities in the country. In fact, each year Taft Charter has more students accepted to UCLA than any other high school in the Los Angeles Unified School District. Taft Charter offers over 19 Advanced Placement courses, and its students score on their examinations well above the thousands of students who take those exams throughout the nation and the rest of the world. Partnered with Los Angeles Pierce College (because of its close location to Taft), numerous college classes in core and elective courses are held on the high school campus. While Taft Charter believes that students are best served when they enroll in rigorous and challenging classes and programs, they should also have the opportunity to express themselves in athletics and other extracurricular activities. With a full array of sports, the performing arts, debate, and a club that can meet every student's interest, students find that they can balance their academic studies with their outside interests. Parents and students interested in observing classes while they are in session can attend monthly tours beginning in November of each year.

ArTES is a new LAUSD magnet school (as of 2014-15). ArTES has been granted increased autonomy by LAUSD to inspire and celebrate innovation. ArTES employs the power of technology to engage learning, and every student here has an iPad. We strive to develop meaningful relationships between students and educators, hold high expectations, value creativity and inquiry, provide support, and celebrate achievements. At ArTES, students are lifelong learners who embody multiple roles within their community: STUDENT – CITIZEN – ARTIST

At ArTES, we create an academic and creative environment that emphasizes depth of exploration over breadth. Our approach follows our four-step mission to identify strengths and needs, hold high expectations, provide support, and display outcomes.

The Buckley School was founded in 1933 as an independent co-educational institution by Dr. Isabelle Buckley. Drawing on her experiences abroad where schools emphasized well-rounded programs, Dr. Buckley developed her own "4-Fold Plan of Education," which held the academics, arts, athletics, and ethical education as equally weighted in a child's formal schooling. Her vision for early childhood education drew a loyal following during the early days of The Buckley School when new transplants to the area adopted her philosophy for its value in building a strong and stable community. Buckley's educational philosophy has grown and adapted to meet evolving education needs, including new technology and experiential learning, supporting students with plentiful resources, meaningful personal connections, and a deep commitment to fostering a love of learning.

William Litton, Director of Admissions and Outreach

www.es-la.com

Founded in 2012, The Episcopal School of Los Angeles (ESLA) is an independent, college preparatory day school committed to rigorous inquiry, social justice, and open dialogues. The majority of ESLA's operating budget is dedicated to financial aid; thirty percent of our student body lives at or below the poverty line and receives full aid, and another forty percent receives substantial or partial aid. This allows the school to recruit and enroll the brightest, most dedicated students from all walks of life. Our model is founded upon the belief that the best educational tool for any young person is the collaboration and camaraderie of peers from different backgrounds—peers who have stories and perspectives to share, the stuff of life that simply cannot be gleaned from a textbook. Because our student body is so diverse, the education ESLA students receive inside and outside the schoolhouse is truly unique in Los Angeles. Students learn about their privileges, their trials, and their personal histories in direct relation to their peers and to the city, so that understanding emerges with immediate, transformative force.

The Thacher School, a coeducational boarding high school in Ojai, California, is anything but typical. Here, students encounter a combination they won't find anywhere else: demanding academics, tough character-building challenges and a healthy, authentic community culture that supports them every step of the way. It's how Thacher succeeds in shaping resilient, compassionate, and ambitious young men and women who are prepared to take on the challenges of today's world.

Thacher's mission is one of the many things that makes the School unique among top tier boarding schools:

Thacher trains young men and women in the art of living for their own greatest good and for the greatest good of their fellow citizens in a diverse and changing world. To that end, the School augments its highly challenging academic program with profound lessons learned from the care of a horse, regular chores around the School, teamwork on playing fields, outstanding instruction in the

arts, the give and take of everyday life with schoolmates and teachers, and adventures shared in the wilderness. The aim is to inspire and encourage hard work, integrity, self-reliance, a lifelong love of learning and truth, self-knowledge, and a deep concern for the world in which we live.
